

INJECTION PACKERS

INDEX LLC, a well known name in the field of waterproofing and concrete repairs in U.A.E, is diversifying in the field of supplying and trading of specialized Injection Packers in UAE. with a brand name INDEX INJECTION PACKERS.

INDEX injection packers are used for the injection of different injection grouting materials. These different sizes of Injection packers are filler necks that will work as a connection between the injection pump and the structural member to be injected.

Any Injection System comprises a variety of injection resin grouting materials and many accessories like Injection Packers for the repair of concrete structures.

Injection Packers and Nipple Grippers are normally in different sizes to suit the different application process as per different requirements at different site conditions.

The INJECTION PACKER is an efficient tool to stop leakages and to fill cracks, used world-wide in the construction industry.

Application of Drill-hole Injection Packers and surface Injection Packers are in General Use, depending on the connection type to the building component.

Typical Applications that use INJECTION PACKERS as follows :

LEAK INJECTION
CRACK REPAIRS & INJECTION
EXPANSION JOINT INJECTION
CURTAIN INJECTION
JOINT SEALING
BASEMENT KICKER JOINT INJECTION
BASEMENT RETAINING WALL
VERTICAL CRACKS INJECTION
BASEMENT RAFT SLAB CRACK INJECTION
FLOOR SLAB CRACK INJECTION
EPOXY INJECTION TO STRUCTURAL CRACKS
STRUCTURAL REPAIRS AND SEALING
LAKE AND CANAL WALLS REPAIRS
CONCRETE FOUNDATION REPAIRS & INJECTION

These INJECTION PACKERS can be very useful when the technician is sealing the structural cracks or repairing them using a crack injection methodology

The top button shape fitting head will be used as a good connection.

Depending on the usage type different sizes of INJECTION PACKERS shall be used

All the Injection Packers are equipped with high-pressure fittings.
